About Nissei-Kogyo

We provide plastic and metallic trial products and precision cutting for any material and shape, to the limits of tolerance. If you have a particularly difficult order, please do not hesitate to contact us.

Company strengths

Our 40 years of experience allow us to use a blend of low-tech procedures and high-tech procedures, such as 5-axis processing. This combination means we can cut difficult shapes that are not possible with normal processing, and cut minute and composite parts.

Main products

Processing technology for cutting minute, composite parts in difficult shapes

Thin shapes

* Vertical wall processing with a thickness of $0.15 \text{ mm} \pm 0.03 \text{ mm}$

Fine slits

* $0.15 \text{ mm} \pm 0.02 \text{ mm}$ wide slits
